MGT502

Question 1: <A "HREF=VU Home Page"> Click Here <A>
Correct above HTML code segment.

Question 2: How can you define a consistent web design. Why is it needed?

Answer:

A consistent good designed website is generated for general public that allows users to attain what they want as quickly as possible without spending much effort.

A consistent good design assists the user in recovering from errors.

Question 3: What is action-oriented approach for Software Design?

Answer:
In the case of action-oriented approach, data is decomposed according to functionality requirements. That is, decomposition revolves around function. In the OO approach, decomposition of a problem revolves around data. Action-oriented paradigm focuses only on the functionality of a system and typically ignores the data until it is required. Object- oriented paradigm focuses both on the functionality and the data at the same time. The basic difference between these two is decentralized control mechanism versus centralized control mechanism respectively. Decentralization gives OO the ability to handle essential complexity better than action-oriented approach.(Page 80)

Question 4: what is error in it >(sqrt x) in LISP

Question 5: Why weighted average cost of capital (WACC) should be used as discount rate foranalyzing the financial viability of a project?

Answer:

The WACC is the minimum return that a company must earn on an existing asset base tosatisfy its creditors, owners, and other providers of capital, or they will invest elsewhereBroadly speaking, a company's assets are financed by either debt or equity. WACC is theaverage of the costs of these sources of financing, each of which is weighted by itsrespective use in the given situation. By taking a weighted average, we can see how muchinterest the company has to pay for every dollar it finances.

A firm's WACC is the overall required return on the firm as a whole and, as such, it isoften used internally by company directors to determine the economic feasibility of aproject . It is the appropriate discount rate to use for cash flows with risk that is similar tothat of the overall firm.

Question 6: A case given that non resident person earn salary from UK and pay tax in UK. describe tax treatment of this salary earned in Pakistan

Question 7: Basic salary was 36350 in tax year 2012 and amount of exampted medical allowonce was required to calculate under IT ordinance 2001.

Question 8: Define conditions under which the business income earned by non resident is treated as Pakistan source income

Question 9: Define demmed income

Question 10: Define employment also mention section

Question 11: Define Income that is charged to tax under section 2(9).

Answer:
